GETTING STARTED

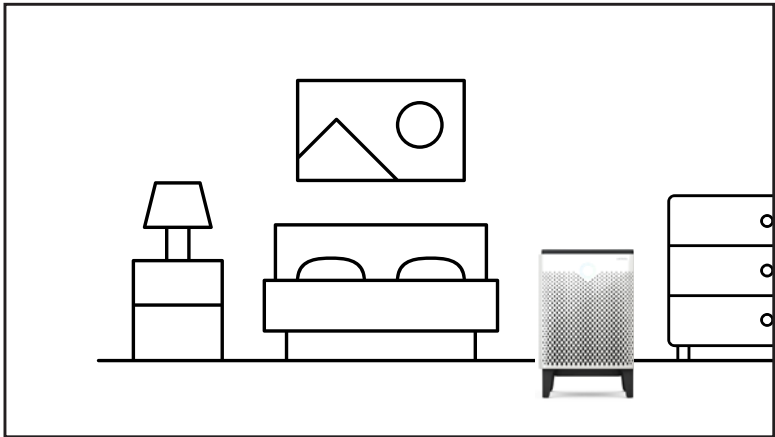

GETTING STARTED 1/6

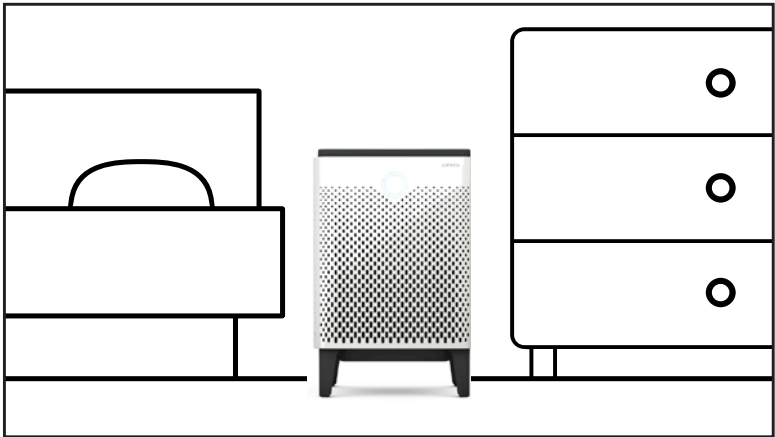

VO: This video will serve as a quick overview on how to set up your Airmega and learn about its features. In this video we are showing the 400s model, but don't worry, this video will help you with all models.

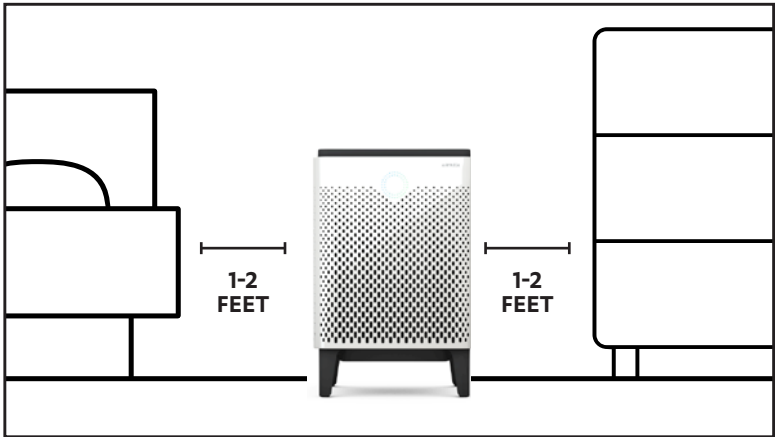

VO: To get the most out of your Airmega, choose the room where an air purifier is most needed, like a living room or bedroom.

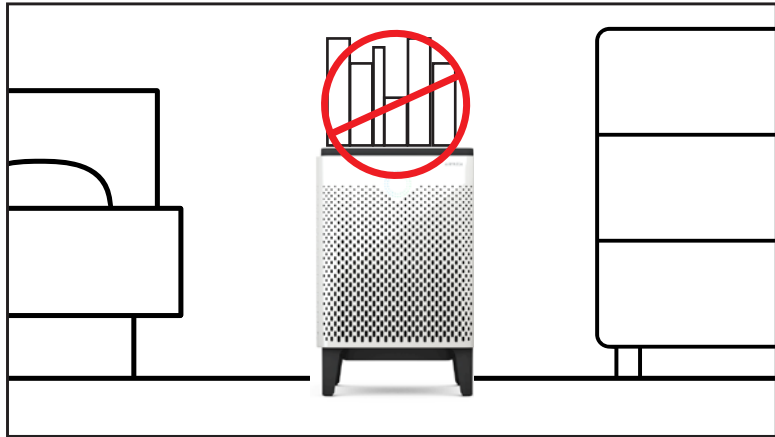

VO: To get the most out of your Airmega, choose the room where an air purifier is most needed, like a living room or bedroom.

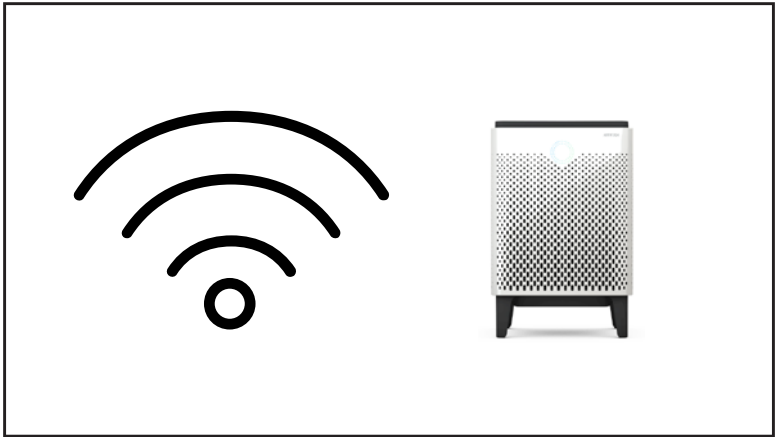

VO: Make sure that there isn't anything blocking the sides or top of the Airmega.

VO: You'll want at least 1-2 feet between the side air inlets and any object.

VO: Also, make sure you don't put any objects on the top cover.

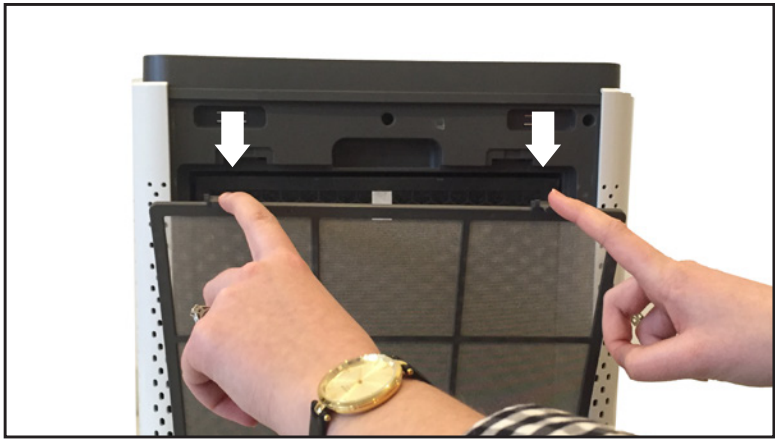

VO: For the wi-fi enabled 400s and 300s models, check to see if your Wi-Fi signal strength is strong enough where the Airmega will be placed.

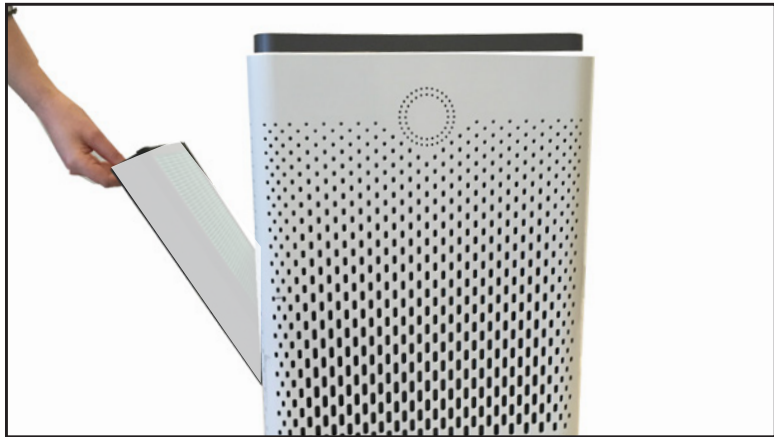

VO: After you've taken the Airmega out of the box, open the side covers...

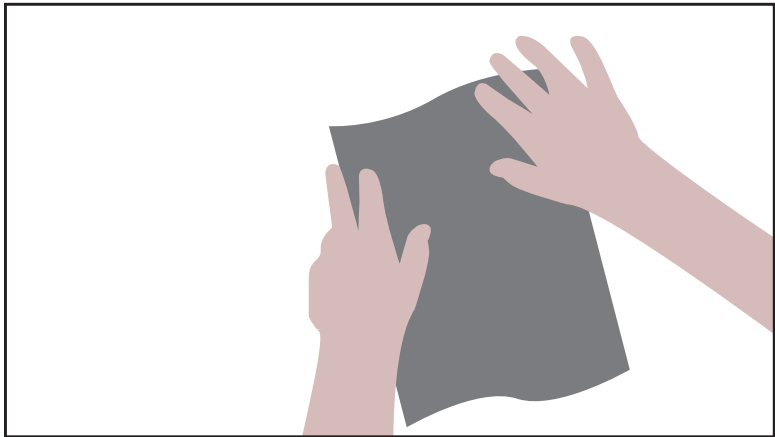

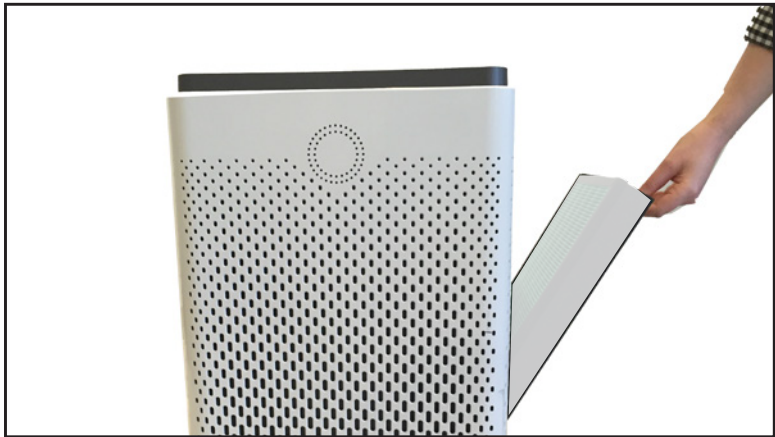

GETTING STARTED 2/6

VO: ...remove both pre-filters....

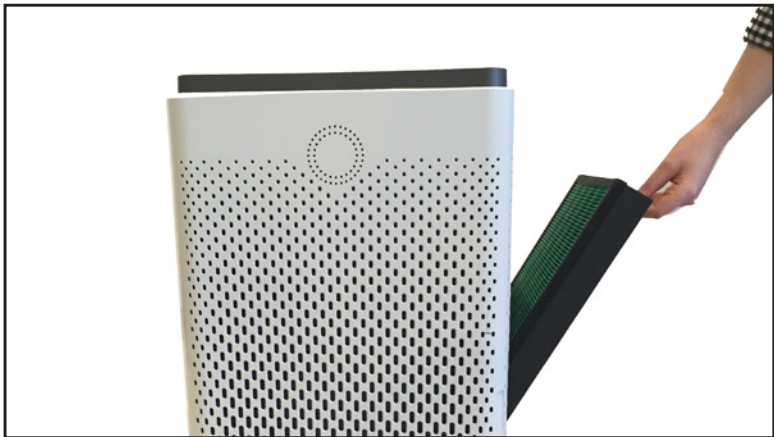

VO: ...both packaged filters...

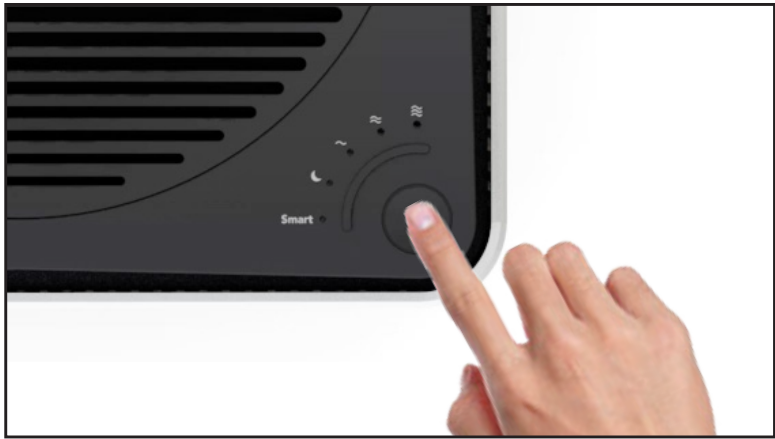

VO: Remove the plastic wrappers on the Max2 filters...

VO: ...Put them back in with the black face facing outwards...and close up the air purifier.

GETTING STARTED 3/6

VO: Plug in the Airmega...and turn it on.

VO: You can choose smart mode...

VO: ...or you can manually select sleep mode...

VO: ...or the fan speed you desire.

VO: The colored ring on the front of your Airmega is the real-time indoor air quality indicator.

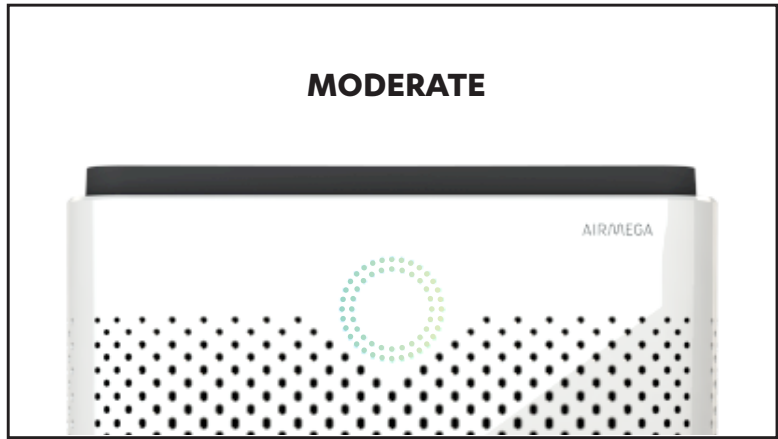

VO: The particle sensor measures the amount of pollutants in the air which will change the color of the IAQ indicator.

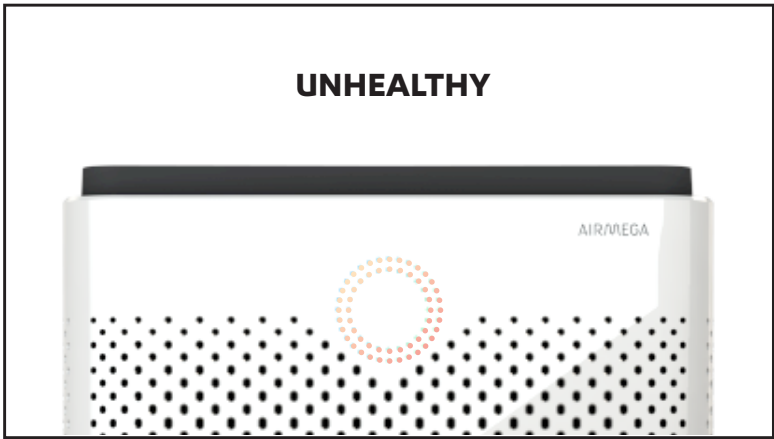

VO: A Blue/green gradient means the air quality is Good

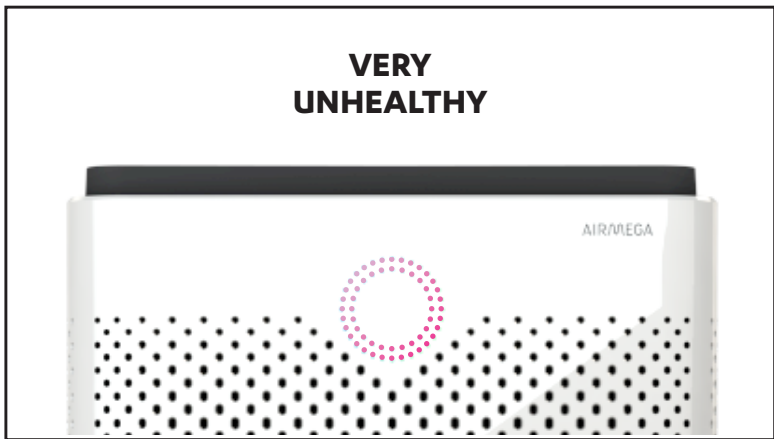

GETTING STARTED 4/6

VO: A Green/yellow: gradient means the air quality is moderate

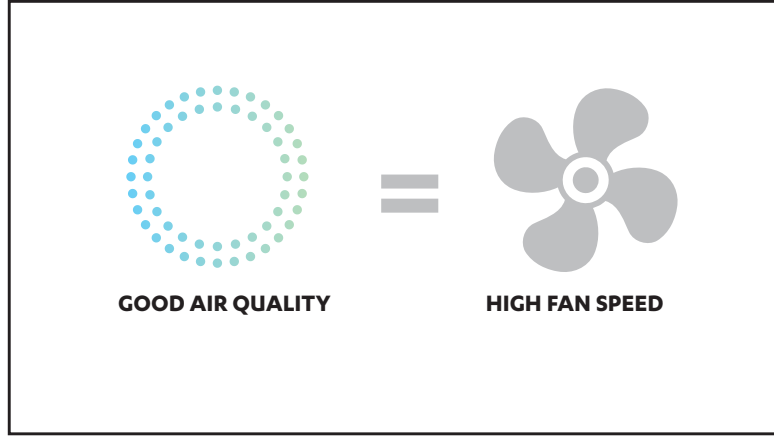

VO: Orange means Unhealthy...

VO: ...And red means Very Unhealthy

VO: On Smart Mode, as the air quality becomes worse, the fan speed will automatically operate at a higher speed.

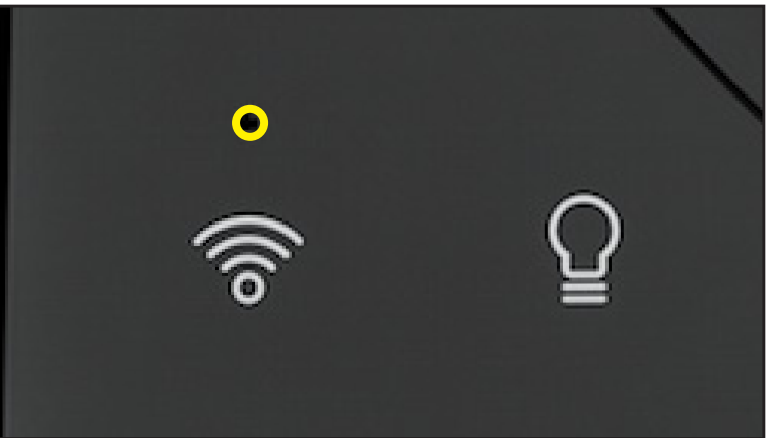

VO: As the air quality gets better, and remains good for 10 minutes or more, Airmega conserves energy by shutting down the fan and going into Smart (Eco) Mode.

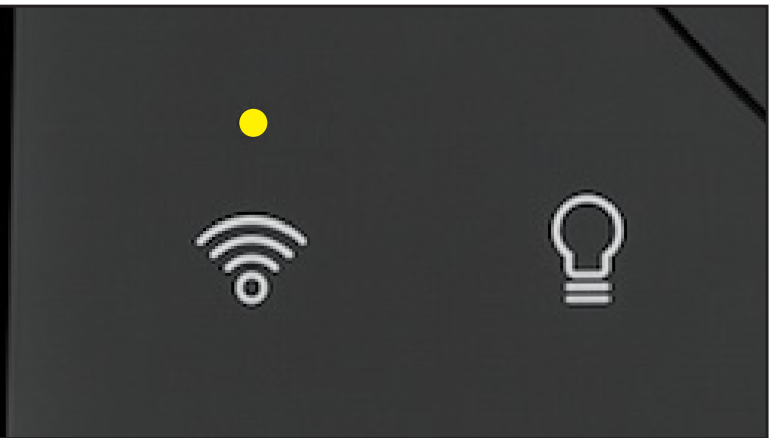

VO: If you have a Wi-Fi-enabled model you will see an LED Wi-Fi indicator:

VO: When the light is off, that means the Wi-Fi mode is off and not connected to the router.

VO: When the light is blinking, that means the Wi-Fi mode is on but not connected to the router.

VO: When the light is on, the Wi-Fi mode is on and connected to the router.

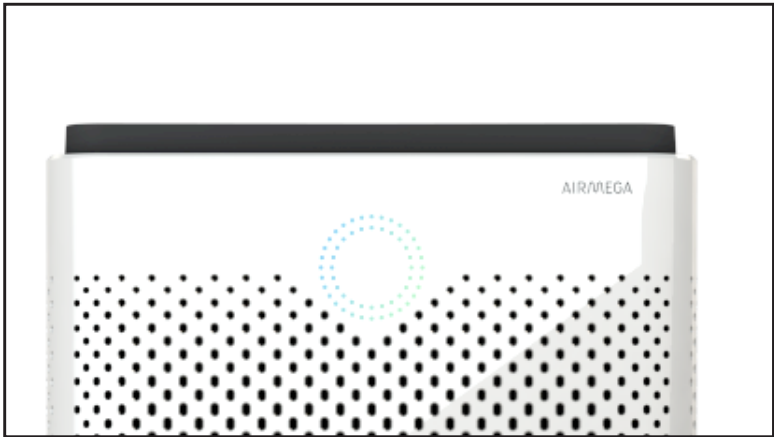

GETTING STARTED 5/6

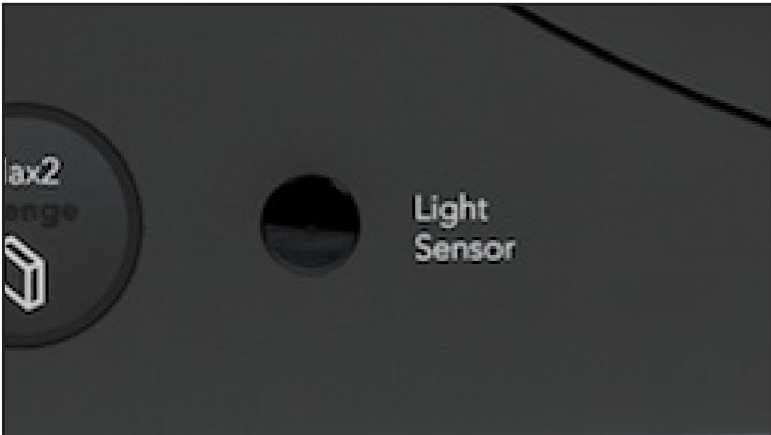

VO: To turn on or off the lights on your Airmega, simply touch the light icon. (lights turn off)

(lights turn off)

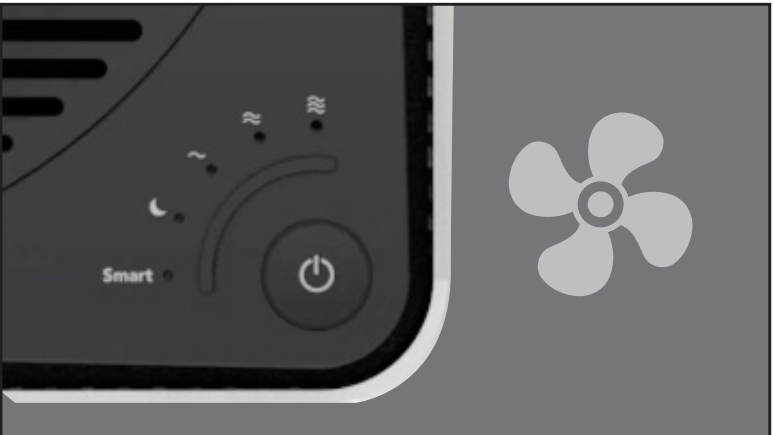

(ring turns off)

VO: For the 400S and 400 models, the light sensor detects the amount of light in the room.

VO: (dark room) While in Smart mode, and if the room has been dark and the air clean for three minutes...

VO: ...the Airmega will go into Smart (Sleep) Mode.

VO: For the 400S and 400 models, the indicator will count down from 100% in 20% increments until it reaches 0%.

VO: At that point, you will be prompted to wash the Pre-filter, change the Max2 filter or both.

VO: You can reset the Max2 Filter and pre-filter status indicator by pressing on the button for more than 3 seconds.

GETTING STARTED 6/6

VO: To turn off the Airmega, simply hold down the on/off button for 3 seconds.

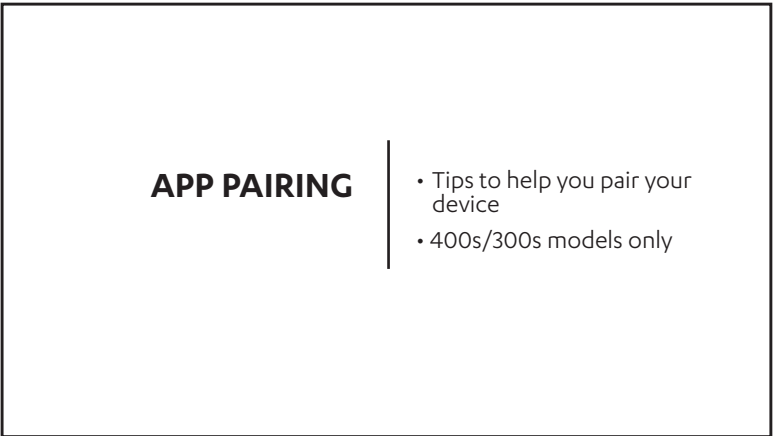

VO: Now enjoy your clean air!

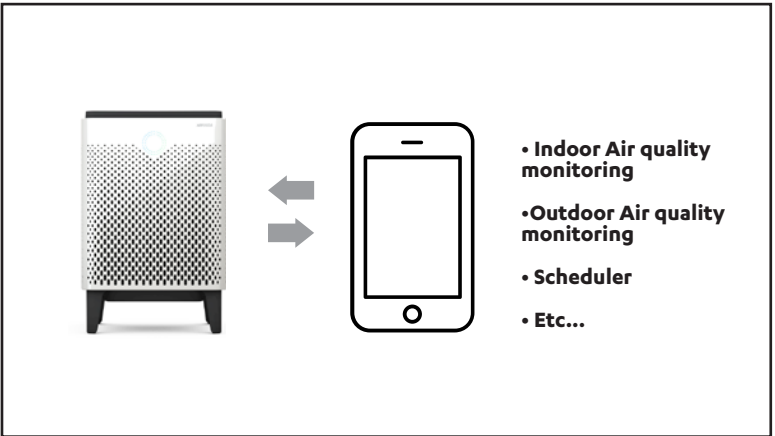

SUPPORT VIDEOS

APP PAIRING iOS / ANDROID

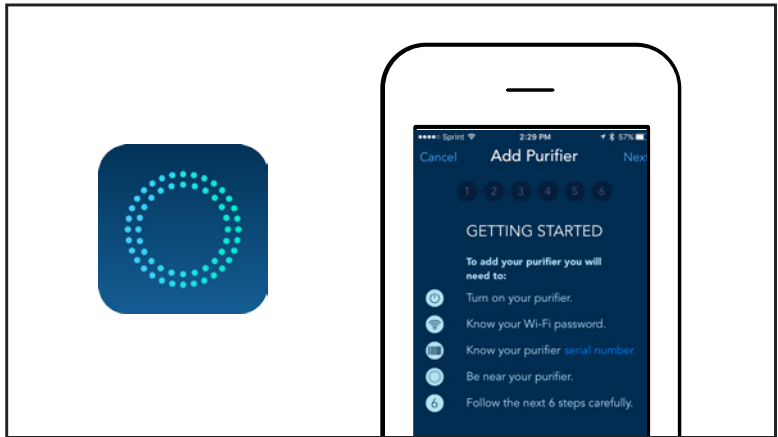

APP PAIRING 2/2

VO: In this video you will learn some tips to help you pair your Airmega with your smart phone. Only models 400s and 300s are app enabled.

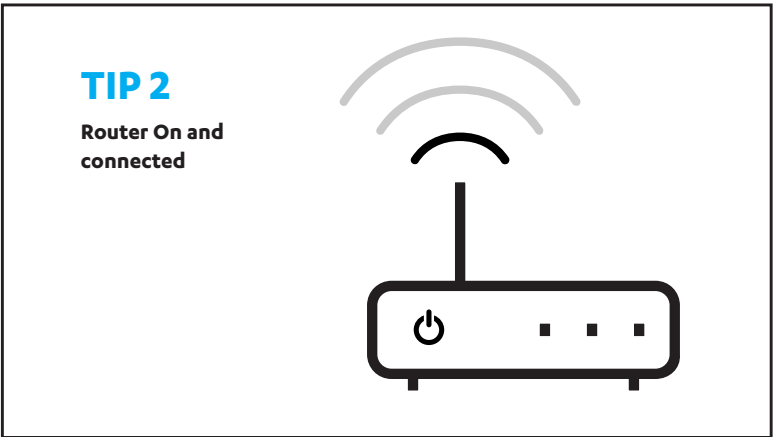

VO: Pairing your Airmega unlocks all of the robust smart features like real-time indoor and outdoor air quality monitoring, access to the scheduler and more.

VO: Once you've installed the mobile app to your smartphone, make sure you follow the tips in this video before going through the App's on-screen instructions.

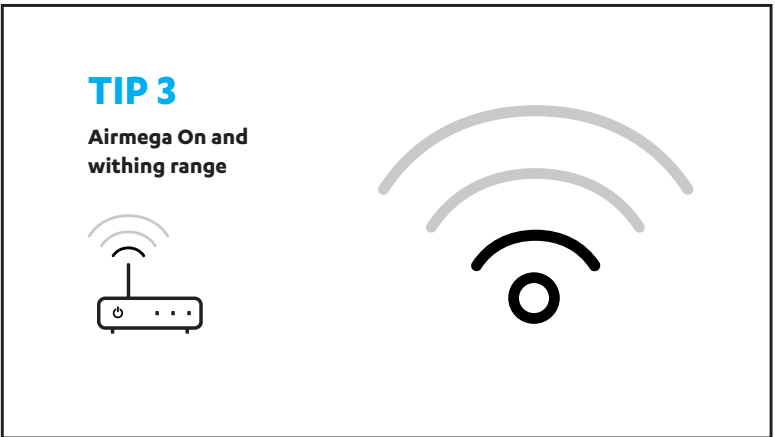

VO: Make sure your smartphone OS is up-to-date.

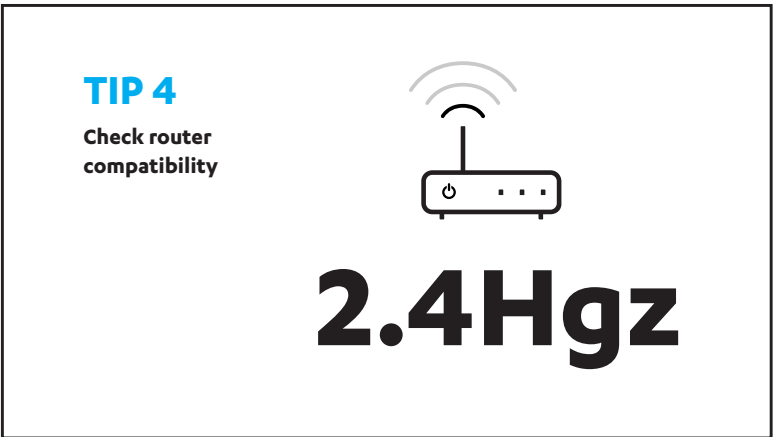

VO: Check that your Wi-Fi router is on and connected to the Internet. If it is working properly, try restarting it.

VO: Look to see if your Airmega is turned on and is within range of your Wi-Fi signal, if not try moving it closer to your router.

VO: You can check the signal strength by looking at a mobile device like your smartphone, tablet or laptop.

VO: Check whether your Wi-Fi router is compatible with the Airmega. The Airmega is compatible with 2.4Hz frequency band Wi-Fi routers. If your router is dual (2.4 Hz and 5.0 Hz), make sure you choose 2.4Hz. Please check the router itself or the manufacturer's website to find out your router's settings.

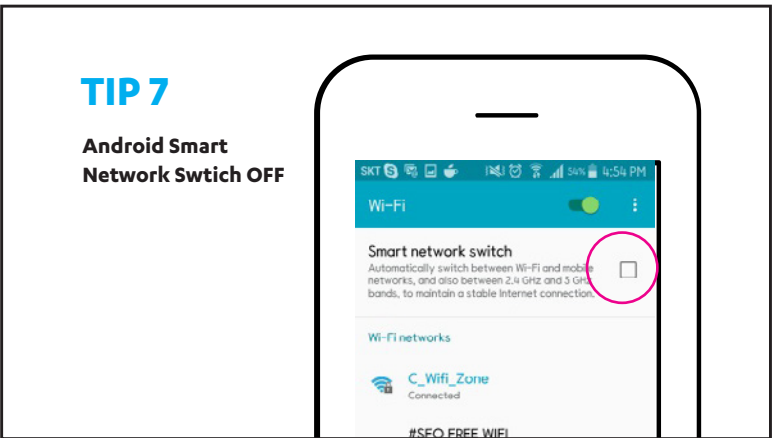

APP PAIRING 2/2

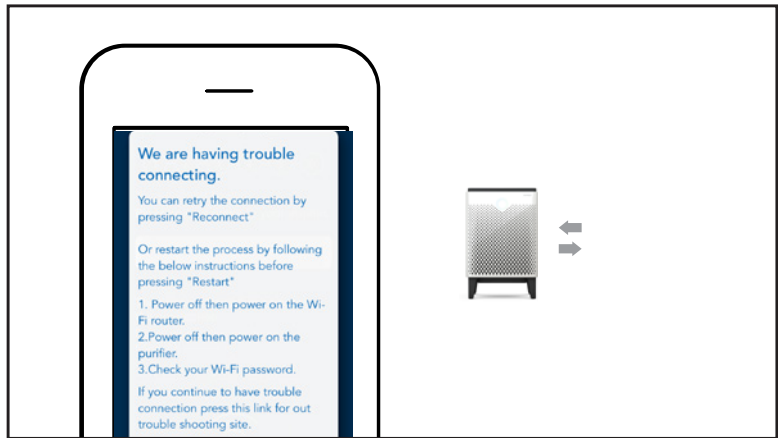

VO: While you're going through the pairing process, we recommend that you stand next to the Airmega the entire time.

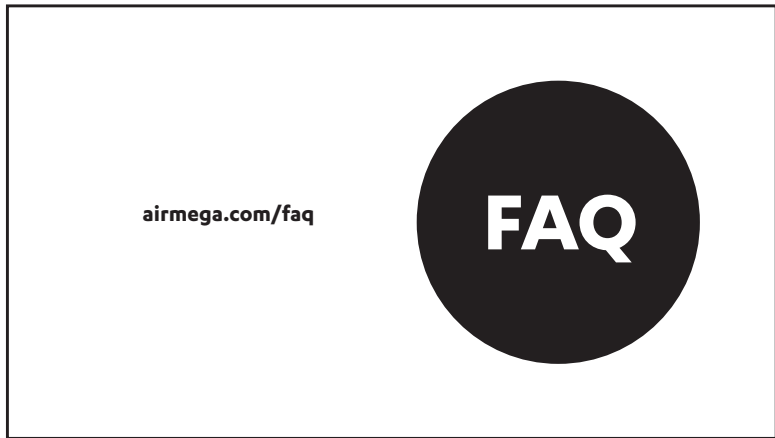

VO: At the beginning of the pairing process, you will be asked to hold down the "Wi-Fi" and "Light" icons together for 3 seconds until you hear a single beep. To complete this step, be sure to place both fingers on top of the icons printed on the Airmega as shown.

VO: For Android users, make sure Smart network switch is off.

VO: If you receive an error message at the end of the pairing process, please review the following trouble-shooting tips:

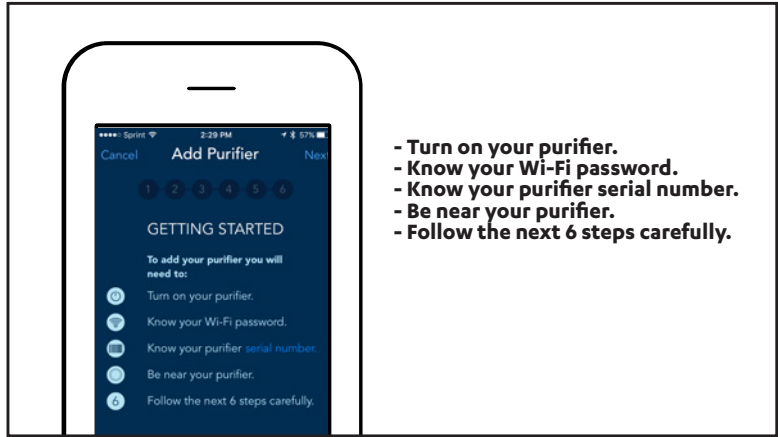

VO: If none of these tips work, please refer to our Frequently Asked Questions for more detailed information....

VO: ...Or, write to us at info@airmega.com or call our customer service center at 1-800-285-0928.

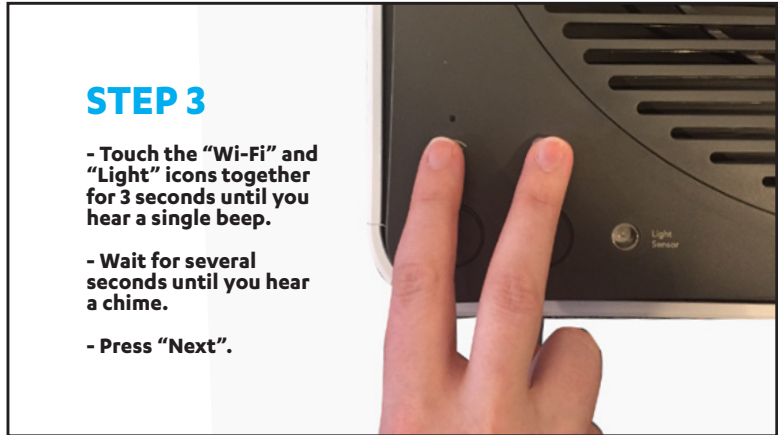

APP PAIRING STEPS

- Turn on your purifier.
- Know your Wi-Fi password.
- Know your purifier serial number.
- Be near your purifier.
- Follow the next 6 steps carefully.

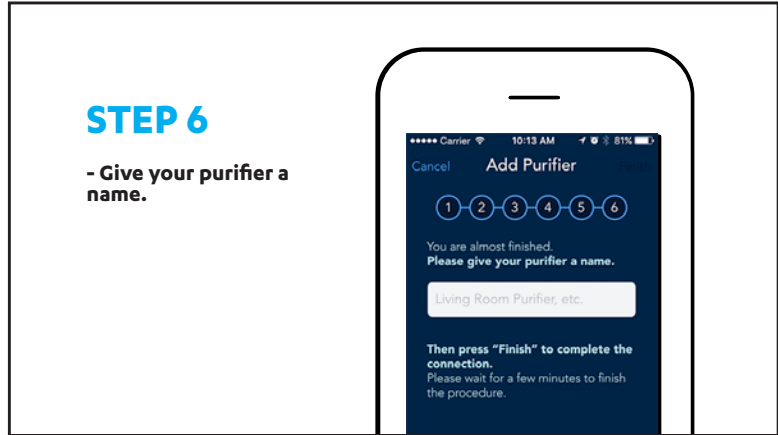

VO: Before starting the pairing process check the following things: Turn on your purifier. Know your Wi-Fi password. Know your purifier serial number. Be near your purifier. And follow the next 6 on-screen steps carefully.

STEP 3

- Touch the “Wi-Fi” and “Light” icons together for 3 seconds until you hear a single beep.
